 **VIVICITA**
JEWELLERY

What To Expect

Here is what you can expect from the bespoke jewellery process at VIVICITA:

Before we meet

Our first appointment is where we begin shaping your ideas into a bespoke piece. To make the most of our time together, we recommend coming with a rough direction in mind.

Before your appointment, it helps to have:

- A budget range
- 2-3 inspiration images
- A general idea of what you are looking for
- Some time spent exploring jewellery styles you enjoy

You do not need to have every detail figured out. Our role is to refine your ideas, guide you through the possibilities, and help turn them into a design that feels uniquely yours

When we meet

1. Selecting the Gemstone

Our studio offers a curated selection of natural gemstones, with many more available through our trusted suppliers. Simply let us know your preferred colour, gemstone, shape, and budget before your appointment. We will prepare a selection tailored to your preferences, ready for you to view in person.

2. Design consultation

Together, we will discuss your ideas, the creative team will translate your ideas into a series of digital-drawn rough design sketches. These concepts will explore different structural layouts, durability, and setting styles to help you visualize the final piece.

Bespoke projects typically start from **SGD 3,000**. If you are happy with the proposed direction, a deposit or purchase the main stone to secure your project and allows us to begin developing the detailed design.

After we met

Within **1-2 weeks**, we will prepare your bespoke design based on our discussion and send you the design drawings, final quotation, and production timeline for review. Once the design is approved, production will begin.

As every piece is handcrafted exclusively for you, design changes can no longer be made after this stage. Your jewellery will then be completed within approximately **6-12 weeks*** and will be ready for collection.

*Highly intricate or complex designs may require additional time, which will be explicitly communicated upfront.

“

Not Ready to Commit?

If you're happy with the proposed design direction but are not yet ready to commit to the gemstone or project, you may continue with a Detailed Design Proposal for **SGD 250**.

We will prepare detailed design drawings, together with the final quotation and production estimate. If you decide to proceed with the project later, the SGD 350 will be credited towards your project. If not, you are welcome to stop there.

”
